

## Product Data Sheet- QA4 with Carbigrip infill

### General Description:

QA4 Comprises of a high tensile strength aluminium extrusion, with our unique Carbigrip carborundum infill, which is made up of a resin bound mixture of abrasive grits. QA4 can be fitted to any sound substrate and is suitable for both internal and external applications. QA4 is part of our modular nosing range and can be combined with our other profiles such as QA1, QA2, Or QA3 to create a simple nosing or a full tread cover.

### Colours:

**Nosing Profile;** available in Mill aluminium (Average LRV 71.65) or Satin Bushed Aluminium

**Carbigrip insert;** Yellow (LRV 47.07), Black (LRV 4.76), White (LRV 58.45), Dark Grey, Light Grey, Dark Brown, Light Brown, and others on request.

### Suitable for use:

- ◆ On all stairs/landings substrates
- ◆ For internal and external applications
- ◆ On heavily trafficked steps and stairs
- ◆ In all environments - dry, wet, greasy
- ◆ In all pedestrian areas including shopping centres, railway stations, car parks
- ◆ In specialist work areas including food processing, water treatment plants
- ◆ In military bases, prisons, police stations

### Principal features/benefits of use:

- ◆ Can be affixed to all sound surfaces
- ◆ Highly durable
- ◆ Highly slip resistant
- ◆ High definition
- ◆ Variety of infilling colours
- ◆ Low maintenance
- ◆ Easily fixed
- ◆ can be supplied pre-drilled with fixings

## Product Data Sheet- QA4 with Carbigrip infill

### Aluminium profile:

Brushed extruded aluminium alloy (6063) hardened to T6

### Maximum single length:

3000mm

### Tread Inserts:

Carbigrip - a composite of various grits, including Aluminium Oxide, set in a cured epoxy resin. Standard colours: Black, White, Yellow, Dark Grey, Light Grey, Dark Brown, Light Brown others available subject to MOQ.

### Compatible Profiles:

QA4 can be combined with our QA1, QA2, QA3, and our QA5 nosing profiles to create a nosing or tread cover to meet your requirements, contact us for more details and for help choosing your configuration.

### Slip Resistance:

Slip Resistance Data: - Assessed against UK Slip Resistance Group guidelines for the potential of slipping for people on a flooring material Tested using the Pendulum /4S method - Result: Extremely low potential for slip in dry and wet conditions

Average surface roughness (Rz values) = 86-90 um (minimum recommended by H&SE -= 10 um)

### Standard Supply:

Manufactured to bespoke lengths and available Pre-drilled upon request. Standard fixings can also be supplied on request.

### Maintenance:

To ensure effective slip-resistance and optimum step edge definition is maintained, remove accumulative dirt and grease from the walking surface at regular intervals. Cleaning should be by gentle scrubbing with a solution of proprietary floor detergent and warm water. The aluminium may be buffed using a fine grade steel work.

### Installation:

The application surface must be reasonably sound and level prior to installation. Stainless fixings are recommended for fixing QA4 in all applications. In addition, a bedding mastic/adhesive is recommended to remove any potential for rattle. Where screw fixing is not possible adhesive only fixing is possible. Prepare the adhesive as instructed by the manufacturer, then coat the back of the tread/ nosing and position on to the step. Apply even weights along the piece and leave undisturbed until the adhesive has fully cured

### Warranty:

QA4 is warranted against premature wear for a period of 10 years, subject to terms and conditions. please ask to see our full performance warranty information.

The information contained on this data sheet is current at the time of printing.
